

ANNOUNCEMENT OF SCHOLARSHIPS
At
**THE REELFOOT LAKE BIOLOGICAL
STATION**

The Tennessee Academy of Science announces that the Reelfoot Lake Biological Station will be open from June 7 to September 10, 1937, for research work, under the direction of Dr. Clinton L. Baker, Director. The Academy requests the faculties of universities and colleges in the State to nominate competent persons who may be chosen to receive scholarship grants to do research work at the Station, and also if possible to assume the payment of a portion or all of the amount of the grants, thus sharing in the support of the enterprise and enabling the Academy to accept a larger number of applicants. It is understood, however, that the awarding of grants is not limited to persons recommended or representing these institutions.

For further information and application blanks, write to

**A BRIEF SKETCH OF THE LIFE AND
WORKS OF
DOCTOR AUGUSTIN GATTINGER**

By
HENRY N. OAKES

A very valuable summary of the life and work of this pioneer Tennessee botanist, including much of his correspondence with Asa Gray, G. Engelmann, John M. Coulter, L. H. Pammel, William Trelease, A. W. Chapman, F. Lamson-Scribner, Albert Ruth, Sereno Watson, C. S. Sargent, Roland M. Harper, Walter Deane, Charles E. Bessey, and others of his time. The correspondence adds much to the history of botany and gives interesting side-lights on the botanists of this period.

Cloth, pp. 1-152. Price, \$2.00, postpaid.

Order from

JOURNAL

of the
Tennessee Academy of Science

EDITORIAL STAFF

JESSE M. SHAVER, *Editor*, George Peabody College for Teachers, Nashville.
HARRY MONK, *Ornithology Editor*, Ovoca Apts., Nashville.
GEORGE M. HALL, *Geology Editor*, University of Tennessee, Knoxville.
H. M. JENNISON, *Botany Editor*, University of Tennessee, Knoxville.
HENRY E. MELENEY, *Parasitology Editor*, Vanderbilt University, Nashville.

Entered as second-class matter February 12, 1926, at the post office at Nashville, Tennessee, under Act of August 24, 1912, acceptance of mailing at special rate of postage provided for in Section 1103 Act of October 3, 1917, and authorized September 16, 1931.

Published quarterly, in January, April, July and October, by the Tennessee Academy of Science at Nashville, Tennessee.

The Journal is sent to all members not in arrears for dues. The subscription price is \$2.00 a year, invariably in advance. Single copies 50c. One dollar from the \$2.00 dues of each member is for a subscription to THE JOURNAL OF THE TENNESSEE ACADEMY OF SCIENCE.

All articles and communications for publication, books and publications for review should be addressed to the Editor.

New subscriptions, changes of address, and applications for membership should be addressed to the Secretary. Personal items, news of events in the scientific world, and other notes suitable for our "Notes Here and There" department may be addressed to the Editor.

THE TENNESSEE ACADEMY OF SCIENCE

(FOUNDED, 1912, AT NASHVILLE, TENNESSEE)

Affiliated with the American Association for the Advancement of Science

OFFICERS

LOUIS J. BIRCHER, *President*, Vanderbilt University, Nashville.
PEYTON N. RHODES, *Vice-President*, Southwestern, Memphis.
JESSE M. SHAVER, *Editor*, George Peabody College for Teachers, Nashville.
J. T. MCGILL, *Secretary-Treasurer*, Vanderbilt University, Nashville.
MISS ELEANOR EGGLESTON, *Librarian*, Vanderbilt University, Nashville.

The Tennessee Academy of Science is very anxious to include in its membership all teachers and professors of science, research workers in science both in educational institutions and industrial establishments, and all others who are interested in some phase of science. We invite you to join our organization and take part in our activities. The annual dues are: \$2.00 for members and \$10.00 for sustaining members. They may be sent direct with your application for membership to the secretary.

THE CHOICE FOR LASTING SATISFACTION

Your GGBET Microscope will be a source of continuous gratification for years to come. Here is an instrument with superior stability, balance and rigidity, the three essentials of a good microscope stand—plus a beauty of functional design that arrests the eye.

The inclined binocular body assures you maximum comfort at all time. The integral mechanical stage and centering sub-stage, the most advanced type offered, is the last work in convenience and accuracy. Optics are Bausch & Lomb designed and Bausch & Lomb built—your guarantee of outstanding quality.

For complete details write for Catalog D-12 to Bausch & Lomb Optical Co., 657 St. Paul Street, Rochester, N. Y.

NEW BOTANY CHARTS

New charts added to the Turtox Chart Series this year enable us to offer nearly forty charts dealing with botanical subjects. These include: 6 charts on Green Algae, 2 charts on Brown Algae, 1 on Red Algae, 5 on Fungi, 1 on Lichens, 2 on Liverworts, 2 on Mosses, 3 on Pteridophytes, 1 on Cycads, 3 on Gymnosperms and 13 charts on Angiosperms.

These American-made charts are large enough to use before a class of thirty students, yet their cost is very low. The top price is only 50 cents per chart, and you pay as little as 36 cents when you buy them in sets. May we mail you the latest descriptive list?

GENERAL BIOLOGICAL SUPPLY HOUSE

Incorporated

761-763 EAST SIXTY-NINTH PLACE
CHICAGO

AMONG the specialties which we prepare are Crayfish. The very largest specimens are purchased from leading southern markets. All dead or mutilated animals are discarded. Killing and hardening are done under the most careful supervision, resulting in specimens that are *straight*, thoroughly preserved, and firm but not too brittle. Every specimen is internally injected. Carolina Crayfish will measure up to the expectations of the most critical user.
