BOTANICAL MODELS

JM-321 Plant Mitosis

This set of ten models showing Plant Mitosis as it transpires in the onion root, was prepared at the request of numerous teachers and is now widely used in schools throughout the country. The various steps in mitosis, from the resting stage to the newly formed daughter cells, are brought out by sculpturing the nuclei, spindles, etc., from the background in full relief and by coloring.

Each model is four inches wide, five inches high, and two inches in depth. Mounted on polished hardwood bases; fully labeled key card supplied with each set.

Price per set\$47.00

Write for the Jewell Model Catalog which describes each of these models in detail.
