The Tennessee Academy of Science is very anxious to include in its membership all teachers and professors of science, research workers in science both in educational institutions and industrial establishments, and all others who are interested in some phase of science. We invite you to join our organization and take part in our activities. The annual dues are: \$2.00 for members and \$10.00 for sustaining members. They may be sent direct with your application for membership to the secretary.

*You are cordially invited  
to see these and other  
teaching aids at the B & L  
Exhibit in the Rotunda  
of the Hall of Science at  
the Century of Progress.*

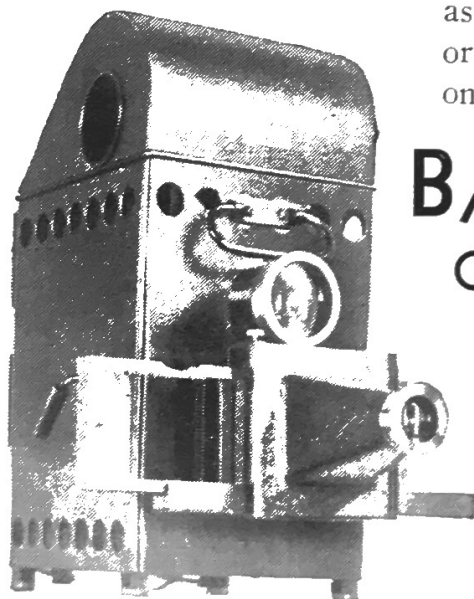

# Helps *for* Over-burdened Teachers

Effective teaching with restricted budgets, fewer teachers and larger classes calls for the most efficient teaching aids obtainable.

The B & L Triple-Purpose Micro-Projector makes mass instruction easy in Science laboratories. At distances of from four to fifteen feet it projects (1) permanently mounted specimens for large-scale instruction; (2) living specimens mounted in liquid; (3) it also projects images on paper for students and teachers notebook drawings. Light, strong, easily portable. Low in price . . . \$43.50 for 110-volt A. C. (\$46.50 for 110-volt A. C. or D. C.).

Balopticon KOSB is of the translucent screen type and is placed behind the screen and projects through it. It enables the instructor to face the audience and teach in a room light enough for the students to take notes without eyestrain. No assistant necessary. Projects either slides or opaque material. Complete details sent on request.
